We provide upcycling solutions & breathe new life to food side streams

Our Mission

We enable the production of healthy & truly sustainable food products by reducing food waste & using upcycling as a technology.

Global challenges

Resources of
1.7 planets
needed

10 billion people to
feed by 2050

Heavily increasing
raw material prices

Closing the protein
gap & shortage of
protein sources

What we do: We offer a solution to produce unique plant-based meat alternatives with upcycled ingredients

Our new technology offers compared to existing products and processes:

A new, alternative **fiber & protein source**

Reduced **food waste & water** use

Regionally sourced and **globally** scalable

Great **taste, texture** & no added colors

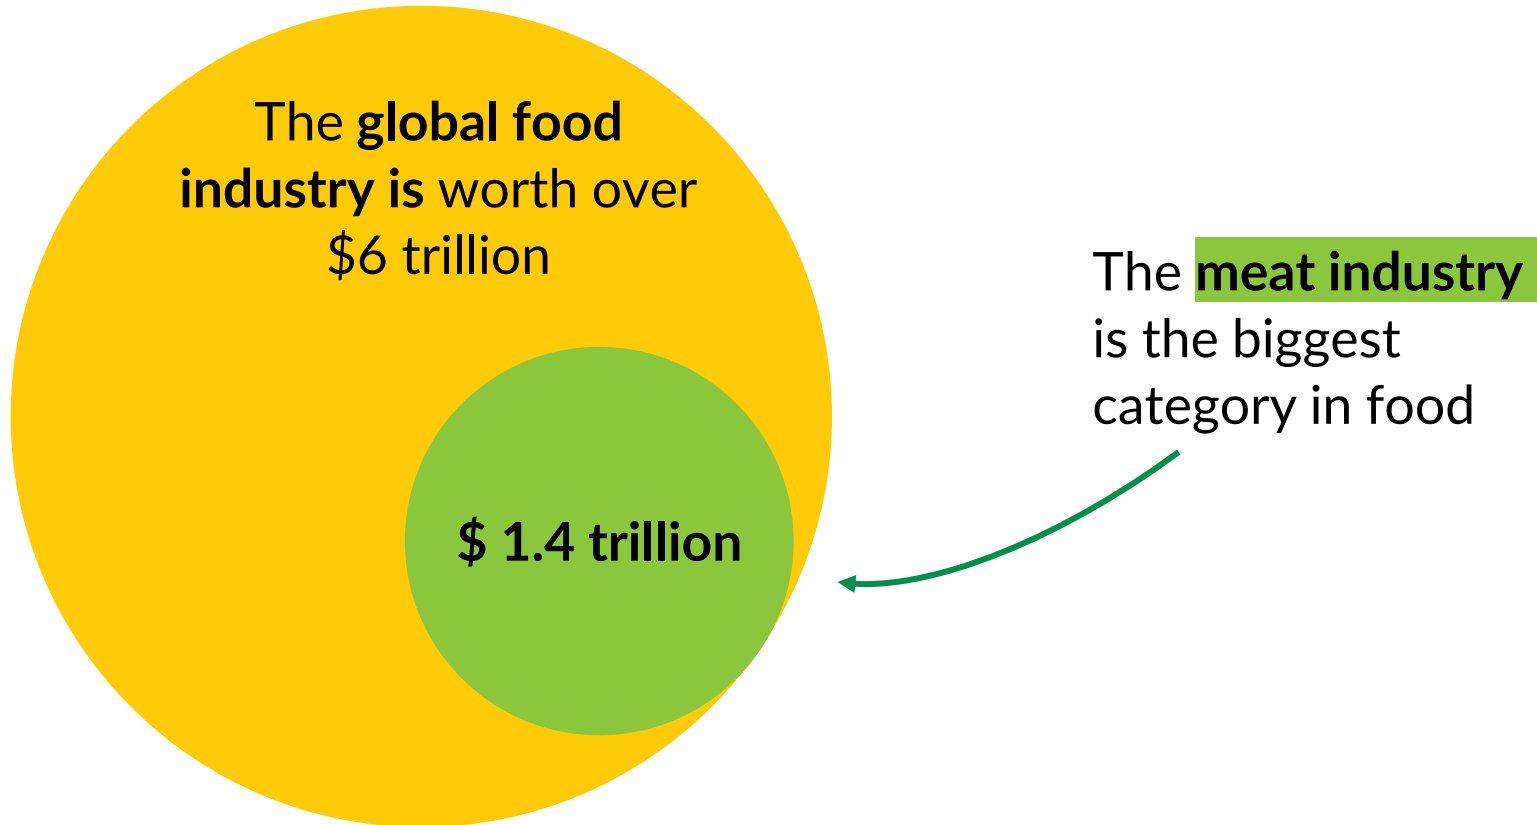

Healthy because naturally rich in fibers

Plant-based Meat Alternative
Made with upcycled ingredients.

Why plant-based meat alternatives? The big picture.

These plant-based meat alternatives can be used in various finished products
